

**Press release - March 29th, 2019: “Delivering synergies in the asset management world”**

Eurinvest Partners and DIM Funds are two companies active in asset and wealth management which recently got closer to each other to deliver synergies. Eurinvest is a Luxembourg PSF (Professional of the Financial Sector) which is also present in Belgium through a local branch.

DIM Funds is an open-ended investment with Theo Vermaelen active in its board and investment advisory committee. He's an international authority recognised for his expertise on share buybacks. The fund's strategy is focused on US small and mid-cap companies which are executing share buybacks when they feel undervalued by the market. The Chairman of DIM Funds, Thomas de Mevius, had contributed in 2011 to launch this fund with less than \$10 million. Today the fund has more than \$90 millions in assets under management and displays a capitalisation IRR (internal rate of return) of 8.8% since 2015. The fund has beaten the Russell 2000 index (US small and mid-cap index) by nearly 1.7% per annum since 2015.

Thomas de Mevius has about 15 years of experience in financial markets including a few years at UBS Investment Bank in London. He's been in regular contact with the other Eurinvest Partners: Jean-Marc Michelet and Yves Colot. He recently joined them in Eurinvest as both shareholder and board member.

Eurinvest believes that the arrival of this new shareholder in the capital will strengthen the company by significantly enlarging the fund offering. Together the partners are launching on the 29<sup>th</sup> of March 2019 a new RDT-DBI investment fund (stands for revenues taxed definitely). The target market for this investment fund labelled Eurinvest UCITS and launched with €50 million+ assets are corporate clients. A Global Equities sub-fund will be invested in developed markets mid-caps; a Holdings sub-fund will be invested in European and Asian Holdings.

The Eurinvest fund offering becomes broader and covers a larger part of the risk spectrum; contrasting with the company's history when it specialized in alternative, defensive, flexible and holdings strategies (the latter since 2014). Beyond a larger offering, the collaboration strategy corresponds to the image and client base that Eurinvest is targeting: to better serve private individuals and family companies in their diversification. These changes intervene at a time where

the company has nearly doubled its personnel in 2 years from 7 to 13 persons by strengthening the investment management team and with the arrival of seasoned private bankers.
