

Sub-Fund strategy

Holdings RDT-DBI is a sub-fund of Eurinvest UCITS, a SICAV under Belgian law. The objective of the Holdings RDT-DBI sub-fund is to seek the highest total return possible for its investors through equity selection and an active management of the portfolio. The Fund is actively managed without reference to any benchmark. The sub-fund invests in Holdings as well as Quality stocks listed in countries within European Economic Area (EEA) as well as in countries member of the Organisation for Economic Co-operation & Development (OECD). The sub-fund total Equity exposure is minimum 70% of NAV at all time and can also invest in Bonds, Money Market Instruments and Cash (up to 30% of NAV). The Investment Portfolio Manager has the possibility to use financial derivatives instruments notably for hedging and return enhancement purposes. The sub-fund meets the requirements imposed by the applicable regulations to benefit from the "Revenus Définitivement Taxés" regime (RDT-DBI) and distributes at least 90 % of the sub-fund collected revenues (after deducting expenses, commissions and charges) to shareholders annually.

RDT-DBI Regime

The RDT regime is applicable according to Art. 203, §2, al.2 CIR 92, provided and to the extent that those revenues come from dividends which themselves, meet the deduction conditions or from capital gains realized on shares that may be exempted. Thus, the RDT regime is not applicable for dividends distributed to, and capital gains realized on, the sub-fund shares, provided and to the extent that these revenues come from dividends or capital gains that do not themselves meet the qualitative conditions of RDT deduction.

This RDT exemption only applies to Belgian legal entities that invest in this fund. An individual always pays 30% withholding tax on the dividends paid out.

Value evolution of class I - Dis (€) ⁽¹⁾

Performance period ⁽²⁾	R-Share ⁽⁴⁾	I-Share	Risk metrics ⁽³⁾	R-Share ⁽⁴⁾	I-Share
June 2022	-6.81%	-6.76%	Volatility (annualized)	na.	17.0%
Year-to-date	-13.96%	-9.42%	Sharpe ratio	na.	0.02
2021	na.	+ 21.76%	Max. Drawdown	na.	-33.1%
2020	na.	- 7.19%			
1 Year (annualized)	-9.04%	-10.13%			
Since Inception (annualized)	na.	+ 0.39%			

Notes : (1) Source data: Bloomberg, Banque Degroef Petercam Luxembourg. Reinvestment of gross dividends; Share-class NAV first date: R-share is 06/10/2020 and I-share is 29/03/2019; Value evolution is based on historical data, which offer no guarantee of future returns.
 (2) Source data: Bloomberg. Performance are calculated on a cumulative basis for: (i) monthly period; (ii) year-to-date (period from the 1st of January of the current year till the report date); (iii) the year 2020; and on actuarial basis for periods of over one year return. The reinvestment of the gross dividends is taken into account for the calculation of the returns. Share-class NAV first date: R-share is 06/10/2020; I-share is 29/03/2019. Figures indicated above do not include commissions possibly linked to potential entry or exit fees nor taxes. Returns are based on historical data, which offer no guarantee of future returns.
 (3) Volatility is defined as a statistical measure of the dispersion of returns. Volatility is measured as the variance between returns from the sub-funds. Volatility is annualized and calculated on a daily basis since inception. Maximum drawdown is defined as the maximum observed loss from a peak to a trough of the sub-fund Net Asset Value, before a new peak is attained. Maximum drawdown is an indicator of downside risk calculated since inception. The Sharpe ratio is used to help investors understand the return of an investment compared to its risk. The ratio is calculated since inception as the annualized return per unit of annualized volatility.
 (4) Share class R NAV first date is 06/10/2020. Returns and performances cannot be presented as the share class must have existed for at least one year according to article 17 1° of the Royal Decree of 25/04/2014

Risk Indicator -SRRI (Synthetic Risk and Reward Indicator)

The above risk level is calculated on the basis of the sub-fund's volatility over the medium term (5 years) or on a simulation if the sub-fund was created within that period. The volatility of the sub-fund may fluctuates over time, which may change its risk level.

The SRRI accounts for the market risk and risk on capital. The sub-fund does not guarantee a protection on the capital invested by investors and therefore investors' capital fluctuates overtime. The risk/return profil indicated above can be essentially explained by the presence of equity in the portfolio.

For more information concerning the risks, please refer to the prospectus and KIIDs.

Risks that are not necessarily included in SRRI but which may lead to NAV changes

- Liquidity risk:** Risk that positions cannot be liquidated in time at reasonable prices.
- Operational risks:** the sub-fund may lose some or all its money in case of failure in assets custody, fraud, corruption, political action or any other undiserable events.
- Management risk:** under abnormal market conditions, the usual management techniques may be ineffective or unfavourable.
- Credit risk:** The risk of default by an issuer or a counterparty exists but is low.
- Fiscal risk:** the perennity of the RDT-DBI regime is not guaranteed and can be a risk in case of a change in government and fiscal policies.
- Concentration risk:** investment policy ensures a diversification of portfolio concentration risk by limiting investment at 30% of total assets in a single sector.
- Inflation risk:** can emerge due to the characteristics of some targeted markets.
- Sustainability risk:** High. The sustainability risk is considered as material. Sustainability risk means the occurrence of an environmental, social or governance event or situation that could potentially or actually have a negative impact on the value of the sub-fund's investment.

Note:

(1) Source data: Bloomberg, Banque Degroof Petercam Luxembourg. NAV: Net Asset Value;

(2) Management fee include both Management Company fee (Degroof Petercam Asset Services SA) and Investment Portfolio Manager fee (Eurinvest Partners SA);

(3) an Individual is defined as a common retail investor when he is a natural person residing in Belgium and is subject to Belgian personal income tax (in opposition to Belgian legal entities).

Tax treatment depends on each investor's individual status and is subject to change throughout times.

(4) Anti-dilution levy mechanisms are implemented in order to eliminate the negative impact on the net asset value of the sub-fund shares caused by substantial subscriptions, redemptions or conversions. It should be noted that the issue and redemption prices, as well as the consideration of these prices during conversion operations, may be adjusted upwards or downwards depending on whether the liabilities of the sub-fund vary upwards or downwards as a result of the subscriptions, redemptions or conversions on the day in question. For more information concerning anti-dilution levy mechanisms, please refer to the prospectus.

(5) Sector exposure is following Global Industry Classification Standard (GICS®). Consumer discretionary is a term for classifying goods and services that are considered non-essential by consumers, but desirable if their available income is sufficient to purchase them. It includes Auto & components, Consumer Durables & Apparel, Consumer Services & Retailing.
